

PySimpleGUI first impressions

By: Gabriel Cseh

Slide Header

A python plugin for creating a GUI for Python

Possible to create:

- File explorer
- Image Editor
- ...

First program

We start by a single windowed program like this:

```
import PySimpleGUI as psg

#creating a layout for the window like this
layout = [
    [psg.Text('Hello')],
    [psg.Button('Exit')]
]

window = psg.Window('Hello Window', layout)

while True:
    event, values = window.read()
    if event == psg.WIN_CLOSED():
        break

window.close()
```
